SUMMARY

Data Analyst with hands-on internship experience in SQL, Python, and Power BI for data analysis, transformation, and reporting. Strong in working with large datasets, performing exploratory data analysis (EDA), and developing dashboards to deliver actionable business insights. Proficient in writing optimized SQL queries, applying Python (Pandas, NumPy) for data processing, and ensuring data accuracy through validation and quality checks. Experienced in documenting analytical workflows using Jupyter Notebook and delivering structured, reproducible analysis. Demonstrates strong analytical thinking, attention to detail, and ability to translate data into meaningful insights for decision-making

SKILLS

Data Analysis & Processing

Data Analysis, Exploratory Data Analysis (EDA), Data Cleaning, Data Transformation, Data Validation, Data Preparation

Business Intelligence & Visualization

Power BI (DAX, Dashboard Development), Tableau, KPI Visualization, Data Reporting

Database & Querying

SQL (MySQL, PostgreSQL, Microsoft SQL Server), Query Optimization, Data Extraction, Data Aggregation, Multi-table Joins

Programming

Python (Pandas, NumPy, Matplotlib, Seaborn)

Tools & Platforms

Microsoft Excel (Advanced – Pivot Tables, VLOOKUP), Jupyter Notebook, Git, GitHub

Professional Skills

Problem Solving, Analytical Thinking, Communication, Attention to Detail, Documentation

WORK EXPERIENCE

Innomatics Research Labs , Data Analyst Intern

11/2025 – 02/2026 | Hyderabad, Telangana

- Processed and standardized a dataset of over 100,000 rows from multiple regions to support weekly analytics enabled business teams to track KPIs across geography and time.
- Designed smart Excel templates embedded with lookup functions and pivot logic, saving 40% reporting time across 4 departments.
- Developed and maintained Power BI dashboards to visualize revenue trends, customer mix, and monthly performance regularly used by managers and analysts across business units.
- Collaborated with 4 analysts and 2 senior managers to define and validate 6 KPIs, improving report reliability and strategic alignment

ACADEMIC PROJECTS

Olist Brazilian E-Commerce Analytics , Python | SQL | Power BI | DAX

- Processed and merged 9 raw e-commerce datasets containing 119,000+ records and 44 columns using Python (Pandas, NumPy) to create a centralized analytical dataset.
- Cleaned and transformed transactional data by handling missing values, normalizing fields, optimizing data types, and engineering customer, revenue, and delivery-related features for analysis.
- Performed exploratory data analysis and executed 40+ SQL business queries using joins, CTEs, window functions, aggregations, and ranking functions to identify customer behavior and revenue trends.
- Developed interactive Power BI dashboards visualizing KPIs including monthly revenue trends, customer lifetime value (CLV), repeat purchase rate, seller performance, delivery efficiency, and review analytics.
- Identified that ~97% of customers were one-time buyers while the top 10% contributed ~17% of total revenue, highlighting customer retention and revenue concentration challenges.
- Discovered that delayed deliveries reduced customer review scores significantly and that metro-city customers spent more on average than rural customers, supporting logistics and regional market analysis.

Restaurant and Consumer Data Analysis, SQL, Power BI

- Designed a relational database by integrating consumer, restaurant, cuisine, and rating datasets to study dining behavior across cities.
- Analyzed customer demographics, budget segments, and cuisine preferences to identify high-engagement consumer groups.
- Built stored procedures, views, and CTEs to evaluate restaurant performance based on food, service, and overall ratings.
- Revealed that student customers with low budgets primarily prefer Mexican and Pizzeria cuisines—suggested price-friendly menu strategies.
- Solved the problem of restaurants not aligning with consumer preferences by uncovering satisfaction gaps across cities, cuisines, and price segments.

EDUCATION

Master of Computer Applications (MCA), SR University

09/2023 – 04/2025 | Warangal, Telangana

Bachelor of Science – Computer Science, Vaagdevi Degree and PG College

10/2020 – 05/2023 | Warangal, Telangana

CERTIFICATIONS

- Data Analytics – Certificate of Excellence, Innomatics Research Labs
- Google Analytics Certification
